

BUSINESS PARTNERSHIP

CAREER SPEAKER

Share information about your company, job categories, and employee career paths to our students on campus.

MOCK INTERVIEWS

Individuals provide students the ability to practice the necessary interview skills it takes to land a job.

BUDGET BOOTCAMP

Businesses and individuals help students in a simulated "real-life" environment after high school in a mock city as they navigate life challenges to live within their budget.

HIRE STUDENTS

Businesses inform us when paid positions become open and will work with our community employment specialist to help land our job seekers interviews.

WORK SITE

A business commits to ongoing worksite experiences and identifying specific job duties that students can undertake. The Best Point employment specialist will provide coaching, supervision, and direct support.

BUSINESS SITE VISIT

Students visit a business, receive a tour, talk with employees, and learn what it's like to work at that particular organization.

JOB SHADOW

Individuals within a business provide our students the opportunity to explore a typical day "in the life" by allowing them to shadow you at your job for part of the day.

SIMULATED ACTIVITIES

Businesses provide us with a work task to be completed by students. This may be held at the business site or at our campus. We provide supervision and support.
